

History

1.0.0.6

Samples:

- Expand documentation and PrintMulti configuration file to include the generation of [EPC QR codes \(Girocode\)](#)
- Check use of BT-81 (SEPA) and expand Alias.txt to include (sepa:58, nosepa:30, international:30)

1.0.0.5

Samples:

- Added LibreOffice Writer samples with macros using UTF8 Text Export.

Composer:

- Small improvements

1.0.0.4

Samples:

- Updated the samples with macros to use the validator and correct the content.

Composer:

- Updated to the latest ZUGFeRD-CSharp version (17.4.0).
- Allow the xRechnung XML file to be validated using the KoSIT XML Validator (included) with the new options /v and /vH (validate and HTML report).

BT-Number	Description
BT-36	seller_adr2
BT-51	buyer_adr2
BT-76	deliver_to_adr2

1.0.0.3

Samples

- Wrong file extension in PrintMulti_XRechnung.ini for !ExtractFile
- Excel embedded files border was not correct

1.0.0.2

Samples

- Multiple embed Excel sheets for invoice_excel.docx
- Added invoice_using_comments.xlsx (using pattern in comments)

Composer

- Added buyer and seller trading name and id
- Added delivery information
- Added allowance (deposit) and charge possibilities (one for each item line and one for total netto)

BT-Number	Description
BT-45	buyer_trading_name
BT-46	buyer_id
BT-28	seller_trading_name
BT-29	seller_id
BT-70	deliver_to_name
BT-75	deliver_to_adr1
BT-165	deliver_to_adr3
BT-78	deliver_to_postcode
BT-80	deliver_to_country
BT-77	deliver_to_city
*	Many for allowances and charges

- New entries in alias table **teilrechnung, abschlagsrechnung, rechnungskorrektur, korrektur, storno**

1.0.0.1

Samples

- MailMergeNoPattern.docm, MailMergeNoPattern.xls New example document that demonstrate how to run ZUGFeRD-Composer without hidden text - just using fields

Composer

- Add option `/iE` which internally creates an empty ext file
- Update ZUGFeRD_Csharp reference to 17.0 (no update of ZUGFeRD.PDF_Csharp since it seems to have problems)
- Allow configuration file to have invoice item positions with number e.g. item_name1
- Add AliasTable which is used for non-Text items and allow to use text from other languages. e.g. Rechnung->Invoice

1.0.0.0

Initial release
